

Training data

```
graph LR; A[Training data] -.-> B[Subsample from training data classified by humans]; B -.-> C{FT Model}
```

The diagram illustrates a three-step process. It begins with a light gray rounded rectangle labeled 'Training data'. A dashed arrow points from this rectangle to a second, similar rectangle labeled 'Subsample from training data classified by humans'. This second rectangle has a dashed border. A final dashed arrow points from the second rectangle to a light blue diamond shape labeled 'FT Model'.
